- Maintain and Update FIMS ERP.

Fullstack Developer | Omeecron Solutions   2021 - 2023
- Expertly crafting highly proficient and scalable back-end solutions.
- Leveraging the power of the Laravel framework for robust server-side development. Seamless integration with Vue.js for creating dynamic and responsive frontend experiences.
- Ensuring a powerful synergy between backend and frontend technologies for optimal performance.

Software Developer | Freelancer   2020 - Present
- Proficiently developing robust backends by utilizing top-tier frameworks.
- Expertise in PHP and Laravel for building scalable server-side solutions.
- Leveraging Node.js and React.js for dynamic and efficient backend development.
- Proficient use of JSP to craft resilient and feature-rich backend architectures.

SKILLS

- Php / Laravel
- Node.js
- Java / JSP

- JQuery
- React.js / Vue.js
- REST Api

EDUCATION

Bachelor Of Science (IT) | Uka Tarsadia University   2020 - 2023
- At Uka Tarsadia University, I built a solid foundation in programming, mastered Data Structures and Algorithms (DSA), and developed strong logical reasoning skills, enhancing my overall professional competency.

Higher Secondary Certificate [SCIENCE - PCM] | TRIS   2018 - 2020
- At The Radiant International School, I pursued a science-focused curriculum, cultivating advanced skills in logic building, problem-solving, and various other critical competencies. This educational experience has equipped me with a solid foundation for analytical thinking and problem resolution.

INTERESTS

- Music Production
- DJing
- Volunteer Work
